

Don't miss out as places are limited!

The Bond IT Course - level one is designed for Captains, Engineers and Deckhands who are required to self manage a ships basic IT network. This course will help them to understand the network building blocks typically used on board a Super Yacht and only has a prerequisite of a basic knowledge of personal computer skills

Topics such as Network Infrastructure, Server Administration, Security and Troubleshooting techniques of all important IT services will be covered. There are also troubleshooting and faultfinding participation exercises during the class that represent real life scenarios.

The course has been designed by Bond Technical Management IT staff and Will Faimatea who together have 30 years onboard experience with IT systems. It is endorsed by the Professional Yachtsmen Association (PYA) and included in the course cost are lunch and a networking dinner after the first day.

The course numbers are kept to a minimum to give better access to the instructor who is our own Microsoft Certified Trainer. Applications for the courses scheduled for 3rd - 4th February and 17th - 18th March in Amsterdam are currently being taken.
