

SeaSatCom introduces new VSAT and TV solutions

Thrane & Thrane is launching its revolutionary new in-house VSAT solution. SAILOR 900 VSAT is an advanced maritime stabilized Ku-band antenna built with the same high quality and performance that has made SAILOR the leading name in maritime communication.

Costs are reduced as the antenna is supplied fully balanced and does not need to be adjusted prior to installation. Installation time is significantly reduced and only a single cable is required to provide DC power, data and control information.

SAILOR 900 VSAT is a triple-axis stabilized VSAT antenna with integrated GPS and the highest RF performance in the 1m antenna class.

Combined with the brand new iDirect modem, the Evolution X5, you have the maximum quality and bandwidth available in today's market.

SeaSatCom's expertise also includes the new range of Sailor satellite TV solutions designed to provide high quality and reliability:

- SAILOR 60 TV
- SAILOR 90 TV

SAILOR TV is purpose-built for crew and guests at sea. They can watch sports, keep up with news or just relax watching the latest entertainment.

Both antennas are very easy to install and operate. They offer outstanding tracking capability and are backed by a global service network with the universal LNB compatible for both Mediterranean and Caribbean coverage.

A user-friendly control unit with intuitive interface makes it easy to operate. It has horizon satellite memory banks with automatic scanning and storage. This means that if you come to a new location where there are no existing satellites in your library, you can use SAILOR software installed on a laptop to ask the antenna to scan the horizon for a satellite. When it finds one, it adds the new satellite to your library, no matter where you are.

Captain's Hideout, Monaco

As usual, the company will be providing a free WiFi service for captains and crew at this year's Captain's Hideout in Monaco. SeaSatCom is sponsoring the event and will be available to meet and advise captains on the most efficient solutions for communications on board.

Stop Press

A free iPad2 given with any new VSAT subscription ordered during the Hideout!

About SeaSatCom

SeaSatCom is a MVNO (Mobile Virtual Network Operator) for yachts. Based in Sophia Antipolis on the French Riviera, It is the one-stop-shop for on-board Internet, Telephony and Television solutions providing subscriptions, airtime, services and equipment.

SeaSatCom engineers are experts in cellular technologies (3G+/GSM), satellite communication (VSAT, Inmarsat and Iridium), IP networks and wireless infra-structure, safety equipment and entertainment systems.

By combining reliable suppliers to the maritime industry with solid expertise in communication technologies, the company has, since 2005, become the natural choice for captains and owners of modern "smart" yachts (communication services run on a daily basis for 100+ yachts).
