Yacht Carbon Offset – News Release

02 September 2010

Twizzle carbon offsets her fuel and her construction

Twizzle the new 57.5m flybridge ketch recently launched by Royal Huisman has introduced a policy of carbon offsetting her fuel. Her Owner has also chosen to offset the embodied carbon footprint from the energy and principal materials used in her construction.

S/Y Twizzle is proud of its Green credentials and has striven to be exceptionally eco-friendly. Not only has it ensured that there is zero discharge into the sea, the yacht is certified to the highest levels for operation in the world's oceans, including Alaska.

Yacht Carbon Offset has certified that emissions arising from Twizzle's forthcoming cruising programme will be balanced tonne for tonne by equivalent emissions savings from green energy projects. The one-off carbon offset for her construction is based on Twizzle's aluminium and steel content, an allowance for other materials and components, and the estimated energy used at the shipyard.

Yacht Carbon Offset's Managing Director Mark Robinson commented: "*We warmly welcome Twizzle to the growing fleet of leading superyachts that have decided to take practical steps to offset their carbon footprint. In particular we are pleased to have enabled her Owner to take this policy further than any other Superyacht to date, by extending the scope to include both the energy and the principal materials of her construction.*"

We have seen that Carbon Offsetting appeals to many of those that own and enjoy the world's finest yachts and we thank Twizzle's Owner and his team for putting this decision into action."

Notes for editors:

S/Y Twizzle

S/Y Twizzle is the result of the Owners' vision of a high performance, high tech sailing yacht with all the comfort and luxury of a motor yacht.

Unrivalled specifications and an unparalleled quality of build make S/Y Twizzle the perfect Sailing Yacht, whether racing in Superyacht regattas or hoisting its sails in minutes to take advantage of even the gentlest breezes.

S/Y Twizzle is the perfect escape for Charters who wish to visit the most beautiful places on earth in comfort and safety.

Further details are available at www.twizzle.org

Yacht Carbon Offset

The full capabilities and flexibility of a luxury yacht enable owners and guests to enjoy the world's most beautiful destinations. With large and powerful yachts a significant "carbon footprint" arises, so this can readily be addressed through a Yacht Carbon Offset.

It works as follows: Greenhouse gas emissions from the yacht are quantified based on the amount of fuel. Then an equivalent quantity of greenhouse gas savings, from independently verified green energy projects, is assigned to balance them out. Yacht Carbon Offset provides a specialist service for those that own and enjoy the world's leading superyachts, and has Lloyds Register Quality Assurance Certification.

Carbon Offsetting complements the initiatives taken by each yacht to improve energy efficiency, since it addresses the impact of the energy that is consumed after all such initiatives have taken effect. In a world where service excellence requires full flexibility of operation, Carbon Offsetting is a practical way to make a real difference.
